Sprint Retrospective, Iteration #_

Project: SEM
Group: 18 A

User Story #	Task #	Task Assigned To	Estimated Effort Per Task	Actual Effort per Task	Done	Notes
Complete implementation of MUST-HAVE features	➢ Task per person: Work on issues assigned to person	Each person	1 – 6 hours (depending on person)	1 – 6 hours (depending on person)	YES	
Initialize the basic entities/controllers/ repositories for all services	➢ Task 1: Initialize the setup for all services	All team	1 – 2 hours	2 hours	YES	
Complete draft of Lab Assignment 1 and ask for feedback	➢ Task 1: Create first draft version ➢ Task 2: Ask for feedback ➢ Task 3: Change based on feedback	All team All team All team	3 – 5 hours 1 minute 1 – 2 hours	4 hours 1 minute 1 hour	YES YES YES	
Create the databases used for the microservices	➢ Task 1: Create databases	1. Alex	2 hours	2 hours		
Configure the API gateway and discovery service	➢ Task 1: Configure API gateway ➢ Task 2: Configure discovery service	1. Alex 2. Alex	1 hour 1 hour	1.5 hours 1.5 hours	YES YES	

Main Problems Encountered

Problem 1
Description:
- The PMD and Checkstyle don't run on the GitLab repository

Reflection:
- We put the PMD and Checkstyle in the project
- We checked and made sure it was also ran on the repository

Problem 2
Description:
- The issues were not properly structured and were not all on GitLab.

Reflection:
- We decided and created a template for how an issue should look like
- We divided who put which issue on GitLab
- We put the issues correctly on GitLab

Adjustments for the next Sprint Plan
Motivate any adjustments that will be made for the next Sprint Plan

- Finalize all MUST-HAVE features
- Test all MUST-HAVE features
- Ensure that the design patterns are finalized
- Ensure that the microservices are properly connected to the database by configuring the `application.properties` file
